To: Renata B. Hesse  
Antitrust Division  
U.S. Department of Justice

I have endorsed Dan Kegel's letter concerning the proposed Microsoft settlement. I feel that the letter provides a good overview of the problems I see with the settlement, in particular the inadequate provisions to limit Microsoft's anticompetitive practices towards OEMs. These practices have already limited the opportunities of other software vendors, such as Be, Inc., to gain a share of the market, and allow Microsoft to avoid competition with other vendors based on the merits of their products.
